OVERVIEW OF OS-3710 / W-2CM FILING

When submitting OS-3710 and W-2CM electronic filings, two files are created:

The first file consists of a single record of 331 positions containing the contents of a single Form OS-3710. The second file consist of multiple records of 448 positions each, one record for each W-2CM filing being submitted. This file may span electronic media, when necessary.

Although two separate files are submitted, they must be submitted together, and may be submitted back-to- back on the same electronic media.

If two files are not submitted, the electronic filing is considered to be incomplete, and will be returned. An incomplete filing is treated as a non-filing, and may result in failure to file penalties.

The CNMI Division of Revenue & Taxation does not accept spreadsheets for electronic filings. However, it is possible to prepare electronic filings using any spreadsheet program, saving the spreadsheets as comma- delimited text files, and submitting these text files as electronic filings. See page 14 - Using Spreadsheets for additional information.

DATA FORMAT FOR THE OS-3710

The OS-3710 Record identifies the employer, and contains totals that must agree with corresponding values reported in the W-2CM Records with which it is associated. The employer will be held responsible for the completeness, accuracy, and timely submission of electronic files.

The OS-3710 Record must be a fixed length of 331 positions.

Do not use decimal points (.) to indicate dollars and cents. Ten dollars must appear as "0000001000" in a numeric field.

All alpha characters entered in the OS-3710 Record may be uppercase or mixed case.

For all fields marked "Required", the transmitter must provide the information described under Description and Remarks. For those fields not marked "Required", a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated media position(s) and for the indicated length.

All alpha characters entered in the W-2CM record may be uppercase or mixed case.

The CNMI Division of Revenue & Taxation strongly encourages transmitters to review the data for accuracy before submission to prevent issuance of erroneous notices. Transmitters should be especially careful that the names, TINs, account numbers, types of income and income amounts are correct.

USING SPREADSHEETS

The CNMI Division of Revenue & Taxation does not accept spreadsheets for electronic filings. However, it is possible to prepare electronic filings using a spreadsheet program, saving the spreadsheets as comma-delimited text files, and submitting these text files as electronic filings. All data format rules for the OS-3710 as defined on page 7 - Data Format for the OS-3710, and all data format rules for the W-

2CM as defined page 9 – Data Format for the W-2CM must be followed when preparing these forms for electronic filing. The following rules apply when using spreadsheets to prepare comma-delimited electronic filings:

One row of the spreadsheet is used for each record. Each column of the spreadsheet corresponds with a field in the record. For your convenience, the spreadsheet columns have been documented in Table 1 - The OS-3710 Record on page 8, and in Table 2 - The W2-CM Record on page 10.

The maximum number of characters to appear in a column should never exceed the field length for the field corresponding to that column.

The width of the columns does not need to equal the field length. The width of each column should be sufficient to fully display the data in that column.

Be aware that some spreadsheet programs will alter numeric displays when column widths are insufficient to display a number. For example, the number 980000000 may be displayed as “98E+008” or as “*****” when the column width is insufficient to display the number. The displayed value is usually what is saved to the comma-delimited file for that field.

It is not necessary to use leading zeros when formatting numeric values but decimal points are never used to indicate dollars and cents. Ten dollars may appear as “0000001000” or as “1000” in a numeric field.

CREATING THE COMMA-DELIMITED FILE

Use the following procedure when you have completed entry of data into your spreadsheet:

Delete all rows containing any column headings. Column headings are not accepted as valid data and will result in the rejection of a electronic filing.

Delete all active rows after the data. Spreadsheet programs will sometimes create output records for empty rows following the end of the data when those rows previously held data or were the target of various formatting commands. These rows will result in output records at the end of your comma-delimited file containing blank fields; such records are not accepted as valid data and will result in the rejection of a electronic filing.

SAVING FROM EXCEL 2007/2010

From the File pull-down menu, select Save as. On the bottom of the Save As window in Save as type pull- down list, select the option CSV (Comma delimited) (*.csv) and click on the Save button.

When following warning window appears, click the Yes button.

SAVING FROM EXCEL 2007

Click on the Office Orb and mouse over “Save As”. From the resulting menu, select “Other Formats”.

In the resulting dialogue box, select CSV from the “Save as type” box.

If you have multiple sheets open, the following dialogue box will be displayed. As long as the active sheet contains the data, click “OK”. If the data is contained in another sheet, switch to that sheet before saving.

Click “Yes” on the following dialogue box:

SAVING FROM EXCEL 2010

Click on the file tab and select “Save As”

In the resulting dialogue box, select CSV from the “Save as type” box.

If you have multiple sheets open, the following dialogue box will be displayed. As long as the active sheet contains the data, click “OK”. If the data is contained in another sheet, switch to that sheet before saving.

Click “Yes” on the following dialogue box:

VERIFYING THE COMMA-DELIMITED FILE

You may double-check the output file using Windows Notepad or a similar program for viewing text records. The resulting file may be corrected if errors are found; however, do not save the file with Word Wrap enabled since this feature will insert unwanted line breaks into long records when the file is saved, rendering the file unusable.

OVERVIEW OF 1099 / W-2GCM / 1042-S FILING

A single file is constructed of records of various data formats for electronic filing of Forms 1099 W-2-G and Forms 1042-S. The specifications for this file are taken from the IRS Publication 1220, although the CNMI Division of Revenue & Taxation has implemented a subset of the specifications.

All records, regardless of format, are a fixed length of 750 positions. This file may sp[CHANGES FOR TAX YEAR 2019](#) media, when necessary.

The various records that comprise the electronic filing occur in a specific order, as follows:

RecordType	Description
Transmitter "T" Record	This record is identified by a "T" in the first position of the record, and must be the first record in the file. This record cannot occur anywhere else in the file. If it is not the first record, or if more than one Transmitter "T" Record exists, the file is considered to be in error.
Payer "A" Record	This record is identified by an "A" in the first position of the record, and must precede Payee "B" Records in the file. This record may only occur after the Transmitter "T" Record, or after a Payer End "C" Record.
Payee "B" Record	This record is identified by a "B" in the first position of the record. One of these records must exist for each payee for which you are filing a 1099 or W-2GCM. The format of this record varies slightly (in positions 544 through 747) depending upon whether you are reporting a payee 1099-DIV, 1099-INT, 1099-MISC, 1099-R, W-2GCM or 1042-S filing. The specific type of Payee "B" Record is defined in the preceding Payer "A" Record, so different types of Payee "B" Records must not be intermixed.
Payer End "C" Record	This record is identified by a "C" in the first position of the record. This record follows a set of Payee "B" Record(s), and indicates the end of a specific type of filings for a specific payer. This record may be followed by either another Payer "A" Record or a Transmitter End "F" Record.
Transmitter End "F" Record	This record is identified by an "F" in the first position of the record, and must be the last record in the file.

THE TRANSMITTER "T" RECORD

The Transmitter "T" Record identifies the entity transmitting the electronic media file and contains information that is supplied on the Form 4804, Transmittal of Information Returns Electronically. The Transmitter "T" Record has been created to facilitate current electronic processing of information returns at the CNMI Division of Revenue & Taxation.

The Transmitter "T" Record is the first record on each file and is followed by a Payer "A" Record. A file will be returned to the transmitter for replacement if the Transmitter "T" Record is not present. For transmitters with multiple diskettes, refer to 3½-Inch Diskette Specifications on page 6.

No money or payment amounts are reported in the Transmitter "T" Record.

For all fields marked "Required", the transmitter must provide the information described under Description and Remarks. For those fields not marked "Required", a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field positions and for the indicated length.

All records must be a fixed length of 750 positions.

The Transmitter "T" Record must be followed by the Payer "A" Record, which must be followed with Payee "B" Records. However, the initial record on each file must be a Transmitter "T" Record.

All alpha characters entered in the Transmitter "T" Record may be uppercase or mixed case.

The Payer "A" Record

The Payer "A" Record identifies the institution or person making payments. The payer will be held responsible for the completeness, accuracy, and timely submission of electronic files. The Payer "A" Record also provides parameters for the succeeding Payee "B" Records. Revenue & Taxation computer programs rely on the absolute relationship between the parameters and data fields in the "A" Record and the data fields in the Payee "B" Records to which they apply.

The number of Payer "A" Records depends on the number of payers and the different types of returns being reported. The payment amounts for one payer and for one type of return should be consolidated under one Payer "A" Record if submitted on the same file.

Do not submit separate Payer "A" Records for each payment amount being reported. For example, if a payer is filing Form 1099-DIV to report Amount Codes 1, 2, and 3, all three amount codes should be reported under one Payer "A" Record, not three separate Payer "A" Records. For Payee "B" Records that do not contain payment amounts for all three amount codes, enter zeros for those which have no payment to be reported.

The second record on the file must be a Payer "A" Record. A transmitter may include Payee "B" Records for more than one payer on a tape or diskette. However, each group of Payee "B" Records must be preceded by a Payer "A" Record and followed by a Payer End "C" Record. A single tape or diskette may contain different types of returns but the types of returns must not be intermingled. A separate Payer "A" Record is required for each payer and each type of return being reported.

All records must be a fixed length of 750 positions.

All alpha characters entered in the Payer "A" Record may be uppercase or mixed case.

For all fields marked "Required", the transmitter must provide the information described under Description and Remarks. For those fields not marked "Required", a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated media position(s) and for the indicated length.

The Payee "B" Record

The Payee "B" Record contains the payment information from the information returns. When filing information returns, the format for the Payee "B" Record will remain constant and is a fixed length of 750 positions. The record layout for field positions 1 through 543 is the same for all types of returns. Field positions 544 through 750 vary for each type of return to accommodate special fields for individual forms.

In the Payer "A" Record, the amount codes that appear in field positions 28 through 39 will be left-justified and filled with blanks. See [Figure 1 - Amount Codes by Filing](#) on page 28 for a complete list of Amount Codes. In the Payee "B" Record, the filer must allow for all twelve Payment Amount Fields. For those fields not used, enter "0s" (zeros). For example, a payer reporting on Form 1099-MISC should enter "A" in field position 27 of the Payer "A" Record, Type of Return. If reporting payments for Amount Codes 1, 2, 4, 7, A and C, the payer would report field positions 28 through 39 of the "A" Record as "1247ACooooo" (In this example, "o" denotes a blank.) In the Payee "B" Record: Positions 55 through 66 for Payment Amount 1 will represent Rents. Positions 67-78 for Payment Amount 2 will represent Royalties. Positions 79-90 for Payment Amount 3 will be "0's" (zeros). Positions 91-102 for Payment Amount 4 will represent Federal income tax withheld. Positions 103-126 for Payment Amounts 5 and 6 will be "0's" (zeros). Positions 127-138 for Payment Amount 7 will represent Non-employee compensation. Positions 139-162 for Payment Amounts 8 and 9 will be "0's" (zeros). Positions 163-174 for Payment Amount A will represent foreign tax paid. Positions 175-186 for Payment Amount B will be "0's" (zeros). Positions 187-198 for Payment Amount C will represent Gross proceeds paid to an attorney in connection with legal services.

The following specifications include a field in the Payee "B" Record called "Name Control" in which the first four characters of the payee's surname are to be entered by the filer. If filers are unable to determine the first four characters of the surname, the Name Control Field may be left blank.

For all fields marked "Required", the transmitter must provide the information described under Description and Remarks. For those fields not marked "Required", the transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field position(s) and for the indicated length.

All records must be a fixed length of 750 positions.

A field is also provided in these specifications for Special Data Entries. This field may be used to record information required by state or local governments, or for the personal use of the filer. The CNMI Division of Revenue & Taxation does not use the data provided in the Special Data Entries Field; therefore, the CNMI Division of Revenue & Taxation programs do not check the content or format of the data entered in this field. It is the filer's option to use the Special Data Entry Field. This field will not affect the processing of the Payee "B" Records.

Following the Special Data Entries Field in the Payee "B" Record, payment fields have been allocated for State Income Tax Withheld and Local Income Tax Withheld. These fields are for the convenience of the filers. The information will not be used by the CNMI Division of Revenue & Taxation.

Do not use decimal points (.) to indicate dollars and cents. Ten dollars must appear as "000000001000" in the payment amount field.

The CNMI Division of Revenue & Taxation strongly encourages transmitters to review the data for accuracy before submission to prevent issuance of erroneous notices. Transmitters should be especially careful that the names, TINs, account numbers, types of income, and income amounts are correct.

Table 6: The Payee "B" Record

<u>Field</u>	<u>Data Type</u>	<u>Position</u>	<u>Length</u>	<u>Dec</u>	<u>Description and remarks</u>
Record Type	A	1	1		Required. Enter "B."
Payment Year	S	2	4	4	Required. Enter the applicable Tax Year "20xx"
Corrected Return	A	6	1		Required for corrections only. Indicates a corrected return, as follows: Code Definition G If this is a one-transaction correction or the first of a two-transaction correction. C If this is the second transaction of a two-transaction correction. Blank If this is not a return being submitted to correct information already processed by Revenue & Taxation.
Name Control	A	7	4		If determinable, enter the first four characters of the surname of the person whose TIN is being reported in on the Payee "B" Record; otherwise, enter blanks. This usually is the payee. Surnames of less than four characters should be left-justified, filling the unused positions with blanks. Special characters and imbedded blanks should be removed. In the case of a business other than a sole proprietorship, use the first four significant characters of the business name. Disregard the word "the" when it is the first word of the name, unless there are only two words in the name. A dash (-) and an ampersand (&) are the only acceptable special characters. Surname prefixes are considered part of the surname, e.g., for Van Elm, the name control would be VANE. For a sole proprietorship use the name of the owner to create the name control and report the owner's name in positions 248 – 287, First Payer Name Line.

Type of TIN	A	11	1		This field is used to identify the type of Taxpayer Identification Number (TIN) in positions 12-20. Enter the appropriate code from the following table: <table><tr><th>Code</th><th>TIN Type</th><th></th></tr><tr><td>1</td><td>EIN</td><td>A business, organization, sole-proprietor, or other entity.</td></tr><tr><td>4</td><td>QI-EIN</td><td>Qualified Intermediary foreign entity</td></tr><tr><td>2</td><td>SSN</td><td>An individual, including a sole proprietor or</td></tr><tr><td>2</td><td>ITIN</td><td>An individual required to have a taxpayer identification number, but who is not eligible to obtain an SSN, or</td></tr><tr><td>2</td><td>ATIN</td><td>An adopted individual prior to the assignment of a social security number</td></tr><tr><td colspan="2">Blank = N/A</td><td>If the type of TIN cannot be determined, enter a blank.</td></tr></table>	Code	TIN Type		1	EIN	A business, organization, sole-proprietor, or other entity.	4	QI-EIN	Qualified Intermediary foreign entity	2	SSN	An individual, including a sole proprietor or	2	ITIN	An individual required to have a taxpayer identification number, but who is not eligible to obtain an SSN, or	2	ATIN	An adopted individual prior to the assignment of a social security number	Blank = N/A		If the type of TIN cannot be determined, enter a blank.

If the TIN is not available, enter blanks.																					
Payee Account Number	A	21	20		Enter any number assigned by the payer to the payee/Recipient (e.g., checking or savings account number). Filers are encouraged to use this field. If fewer than twenty characters are used, filers may either left or right justify, filling the remaining positions with blanks.

THE PAYER END “C” RECORD

The Payer End “C” Record is a fixed record length of 750 positions. The control total fields are each 18 positions in length.

The Payer End “C” Record consists of the total number of payees and the totals of the payment amount fields filed by a given payer and/or a particular type of return. The Payer End “C” Record must be written after the last Payee “B” Record for each type of return for a given payer. For each Payer “A” Record and group of

Payee “B” Records on the file, there must be a corresponding Payer End “C” Record.

In developing the Payer End “C” Record, for example, if a payer used Amount Codes 1, 3, and 6 in the Payer “A” Record, the totals from the Payee “B” Records would appear in Control Totals 1 (positions 16-33), 3 (positions 52-69), and 6 (positions 106-123) of the Payer End “C” Record. In this example, positions 34-51, 70- 105, and 124-231 would be zero filled. Positions 232-748 would be blank filled.

Payers/Transmitters should verify the accuracy of the totals since data with missing or incorrect Payer End “C” Record will be returned for replacement.

PART 4 - FORMS OS-3705 AND OS-3705A

Overview of OS-3705 / OS-3705A Filing

Data Format for the OS-3705

Data Format for the OS-3705A

OVERVIEW OF OS-3705 / OS-3705A FILING

When submitting OS-3705 and OS-3705A electronic filings, two files are created:

The first file consists of is a single record of 330 bytes containing the contents of a single Form OS-3705.

The second file consist of multiple records of 362 bytes each, one record for each OS-3705A entry. This file may span electronic media, when necessary.

Although two separate files are submitted, they must be submitted together, and may be submitted back-to- back on the same electronic media.

If two files are not submitted, the electronic filing is considered to be incomplete, and will be returned. An incomplete filing is treated as a non-filing, and may result in failure to file penalties.

The CNMI Division of Revenue & Taxation does not accept spreadsheets for electronic filings. However, it is possible to prepare electronic filings using any spreadsheet program, saving the spreadsheets as comma- delimited text files, and submitting these text files as electronic filings. See page 16 - Using Spreadsheets for additional information.

DATA FORMAT FOR THE OS-3705

The OS-3705 Record identifies the employer, and contains totals that must agree with corresponding values reported in the OS-3705A records with which it is associated. The employer will be held responsible for the completeness, accuracy, and timely submission of electronic files.

The OS-3705 Record must be a fixed length of 399 positions.

Do not use decimal points (.) to indicate dollars and cents. Ten dollars must appear as "0000001000" in a numeric field.

All alpha characters entered in the OS-3705 Record may be uppercase or mixed case.

For all fields marked “Required”, the transmitter must provide the information described under Description and Remarks. For those fields not marked “Required”, a transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated media position(s) and for the indicated length.

The OS-3705A Record contains the withholding information for an employee for the term of a calendar quarter. The sum of amounts reported on all OS-3705A records must equal certain totals reported in the OS-3705 Record with which they are associated; otherwise, the electronic filing is considered to be in error.

All OS-3705A records must be a fixed length of 135 positions.

Do not use decimal points (.) to indicate dollars and cents. Ten dollars must appear as "0000001000" in a numeric field.

All alpha characters entered in the OS-3705A Record may be uppercase or mixed case.

For those fields not marked "Required", the transmitter must allow for the field, but may be instructed to enter blanks or zeros in the indicated field position(s) and for the indicated length.

The CNMI Division of Revenue & Taxation strongly encourages transmitters to review the data for accuracy before submission to prevent issuance of erroneous notices. Transmitters should be especially careful that the names, TINs, account numbers, types of income, and income amounts are correct.
